(Abstract)

*Keywords:* Catholics; Bacău; Csango; Historical source; Demography; Sociology; Church; Family; Statistics; Genealogy.

The author does not aim to carry out an exhaustive analysis of the document, but just a description, hoping that once immersed in the scientific circuit it will be of use to all those interested in the history of the Catholics in Moldavia, pleading at the same time for the permanent use by the researcher of the document, of sources in general, all of them being a constant in any authentic research. The publication of this document allowed the author of the paper to add one more stone to the edifice at the basis of the preparation of a *History of the Catholics in Moldavia*.
